

IMPROVEMENTS TO CANONS WAY JUNCTION

Following a recent site meeting between residents, various Councillors of Officers from West Sussex County Council we are pleased to say that West Sussex County Council has responded very positively and minor improvements to the Canons Way Junction with the A283 by-pass are now envisaged, as shown on the attached plan. This includes some new signage and cutting back vegetation on the south side, so that cars turning left off the by-pass into Canons Way will have better visibility.

Residents were disappointed to learn that it is unlikely that the speed limit on the A283 will be reduced, but nevertheless this represents a positive step forward in the campaign which the Parish Council has been conducting in conjunction with local residents to get some additional safety measures implemented.
