

Works to MPF Children's Play Area

You will have noticed that we have started to carry out some minor works of improvement to the children's play area, following on from a decision of the Playing Fields Committee recently. We have taken away the mound at the rear, which was of no play value and we were having difficulty keeping "grassed", moved the bench (so as to make it even more accessible to the CCTV camera) and filled in the trench to the CCTV camera (which had sunken as these things do).

The exposed earth has been sown with grass seed, which we hope in this wet weather will now start growing quickly, the object being that as soon as practicable we will have an even more attractive area around the play equipment. We are not removing the other two mounds, following representation that these are valued by children for playing on.
