

White's Bridge

Information from Jonathan Perks WSCC

I am pleased to advise that The Environment Agency has verbally advised its support for the works and methodology proposed in repairing Whites Bridge. Given this I have spoken to the contractor, who advises that works can be programmed to begin 4th November. As you will appreciate, being an exposed site and the season moving towards winter then any timetable can be subject to change; however it is hoped works should be completed within 6 weeks, i.e. finishing on or about 13th December. I will arrange for advisory notices to be put up to this effect tomorrow on the various local paths so that path users are similarly informed.

I appreciate that the continued closure is an inconvenience to many, and I regret this. I trust though the advice above is encouraging, and my thanks to you and the local parish councils for the support given over the past few months.
