

COMMUNITY GARDEN

THE MAIN IDEA!

- The main idea is a big communal garden where the whole community can get involved.
- Many people can come and plant their own or provided flowers with friends and family.
- This garden can be on the cricket field or even by the small park near the library.

WHY THIS?

I have chosen this idea to celebrate Steyning's beautiful countryside. Steyning is one of the most historic and beautiful towns in West Sussex and what is better than a garden that the whole community helped planted to celebrate it!

WHERE?

Steyning cricket field

There are many spaces for a garden in Steyning but the cricket field is one of the most popular places. The garden could be anywhere around the park area or up by the trees at the back.

COST

- The cost is a small amount presuming that people bring their own plants.
- However, if some people cannot bring their own flowers/plants then you would need some spare.
- These flowers could cost up to £400. However you could do some fundraising events to help raise money.

FUNDRAISING

The money for this could be hard to find so you could do some fundraising events. These events don't have to be big things like a fair, but just small stalls and games around the community.

Fundraising events could be:

- Cake and tea sale
- Arts and crafts fair
- Bring and buy sale
- Car wash
- Face painting

Thank you very much for looking at my idea. I hope I provided all the information you need and that all your questions have been answered.
