

Notification of major gas works: Clays Hill, Steyning

We're writing to make you aware of our forthcoming upgrade of our gas network in Clays Hill, Steyning. Our project involves the essential replacement of old metal gas mains with new plastic pipe to ensure we continue to provide a safe and reliable gas supply to the local area. Our contractor KLT will undertake this work on our behalf.

So, that we can minimise the impact of our essential work, we have carefully consulted and planned our works in partnership with West Sussex County Council, our project will start on **Tuesday 03 April 2018** and lasting approximately 6 weeks.

We'll be working in Clays Hill near its junction with Maudlin Lane for approximately six weeks. To keep everyone safe around our work area, we need to install temporary traffic lights in Clays Hill across its junctions with Maudlin Lane, Goring Road, Bostal Road and Bramber Road. During this time, we'll need to replace the existing pedestrian crossing on Brambler Road with a temporary crossing

We've planned to start this project during the school Easter holiday, when the roads are typically quieter, to minimise disruption to the local community. We will also have two teams of engineers working on this project to complete this essential work as quickly and efficiently as possible.

All businesses in the local area will remain open as usual. We do have a compensation scheme in place for local businesses which suffer a genuine loss of trade because of our work. Packs are available from our website, sgn.co.uk, via the Publications section.

We understand that roadworks can be frustrating. However, the new plastic pipe has a minimum lifespan of 80 years. This means that when the work is complete, Steyning residents will continue to enjoy the benefits of a safe and reliable gas supply for years to come.
