

**Comment for the proposed sound proofing of Coombe Court.**

| <b>Club or Organisation</b>           | <b>For or against</b> | <b>Comments</b>                                                                                                                                                                 |
|---------------------------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The Jazz Club                         | Against               | Need more evidence that reverberation will be improved when the hall is full of people.                                                                                         |
| Emma Clarke                           | For                   | Emma thinks the changes will be positive                                                                                                                                        |
| Johnathan Reeves – Grammar School     | Against               | Feels the proposed changes will “dry” the acoustic to such an extent that both the quality of sound and enjoyment of the performers would be compromised.                       |
| Michael Wither – Heber Opera          | Against               | Believes the hall works well as it is and that the changes could have a detrimental effect on acoustics.                                                                        |
| Gary and Zoe Prior – Choir            | Against               | Feel the changes will effect the natural acoustic sound in the room.                                                                                                            |
| Tom Packer                            | either                | Tom gave his opinion on for and against the proposals and said if the upgrade. Amplified sound would be improved but live acoustic performance would be effective.              |
| Colin Hide – Southern Cinema Services | For                   | Said the acoustics are poor at the moment , but also said the sound could be greatly improved by replacing the speakers which he thinks are too small for the size of the hall. |
|                                       |                       |                                                                                                                                                                                 |
|                                       |                       |                                                                                                                                                                                 |
