

Request

As you may know, because the parish council does not do so (despite a resolution last August) the public uploads a recording of all parish council meetings to a public website. Unfortunately, there was no representative of the public available for the important planning meeting of 3rd May 2016 and so the public does not have a recording. It would be much appreciated if you could let me have a copy of Mrs Roxby's recording of this meeting so that it can be passed on and uploaded to the citizens' site, please.

On the last occasion this happened I asked Mrs Luckin if she would kindly oblige without the formality and potential delay of an FoI request which she kindly did. May I make the same request of you, please, though if necessary please treat it as a formal request?

Response 12 May 2016

Refused

I am told that unfortunately on this occasion there was a technical hitch and we were unable to record this meeting
