Subject: Recycling

Hi,

Currently live in Laines Road and walk the lower horse shoe most mornings and quite often in the evening too with my wife. We were fed up with seeing rubbish on our walk so invested in 4 litter grabbers.

The Sunday just gone, we walked the lower and then across the top of the cricket field, where the basketball court is. We managed to collect 3 full bags of rubbish.

From the horse shoe it was mostly poo bags and a few odd bits and bobs. The bulk of the rubbish in the cricket field were cans and bottles with a few pringle tubes and crisp packets. There are rubbish bins on the exit points of the field but there are no recycling points.

It would make sense if there were to be a recycling bin here as many people go to the field with drinks, having the correct disposal facility might encourage people to clear their rubbish. Has this been looked at before?

I think it would benefit our community as it is such a great place to live. Just wish people could take more care and pride where they live.

Kind regards,

Luke
