Subject: Abbey Road Village Green Grass Cutting

Hazel

I believe that at the request of Steypning for Trees you are to arrange for an extra wide cut of the edge to Abbey Road on the "wild side" to assist those planting the hedgerow.

As you know there is a lovely network of grass paths which snake through the area. Just one more is needed to help ensure the new hedge, and particularly the specimen tree which will mark its end, do not obstruct the existing "desire path" which is not currently cut but the very existence of that desire path illustrates that it would be good to do.

It starts at point "A" on the attached sketch plan and heads at right angles to the road for about 20m to join one of the cut paths. Please see photo attached.

Please could you get the contractor to do this additional 20m or so when doing the extra wide cut?

Thank you

Paul
