Subject: Abbey Road Hedging

Hi,

Having read some concerns by a few residents regarding the proposed hedge planting in Abbey Road, I've taken the opportunity to read the information on the proposal and as a resident of Abbey Road myself, I am supportive of what you are looking to do in enhancing biodiversity and wildlife.

As with anything, there will always be opposing views but it seems to me that the new hedge is a well thought through proposal and has my support.

I was unaware of the proposal until a letter was posted through my door this week but I wouldn't have been in any way concerned if I had no knowledge until it was carried out. I just see you as a group trying to do good things.

Incidentally, are you also responsible for keeping the pathway clear between Church Mead and St Andrew's Church? I use this pathway daily and it has never looked so good. Much appreciated if the enhanced maintenance is yourselves.

Best Regards,
