Briefing Note re item 8.2

Below is an email stream regards a recent incident at the orchard on the MPF
Roger will be attending the meeting on Tuesday evening and has kindly agreed to speak to this item.
He has also stated via a phone conversation that the damage was annoying but not too serious.
The trees had no damage, just the cages.
And the all issues had been rectified

Hello John

FYI message sent to Orchard Steering Group about damage in the MPF Orchard on Saturday night.
I tried calling both our Neighbourhood Wardens today, but must have been off duty. Could you bring this to their attention please?
Also I can't see on the website when the first meeting of the Communities Cttee takes place. Is it the same date that Amenities would have been, ie 29th Sept?
Could you let me know please?

Thanks
Roger

Roger Brown

Subject: damage in MPF orchard.

Hello all,

Unfortunately we had some damage in the orchard last night.
It looks as though some drunks have staggered their way past the trees, pulling and pushing the cages as they went. 3 cages have slight damage, but another one has been badly mangled with broken posts, ripped wire and even the display panel broken.
Luckily the trees are undamaged.
I will report it to John and the Neighbourhood Wardens.

I'll do some running repairs during the week, but may need more permanent fixes at our next working party.

Roger.

APPLE
Variety: Sussex Forge
First recorded: 1851 (Pewley/East
Ginstead, Sussex
Widely grown in Sussex and Surrey in
the 19th. Forge was lost from the old
tree working area of the Wotton staff at
ready to pick with St. Andrew and given
until December.
Planted here: September 2015
