

Shoreham Adur Tidal Walls

Downs Link Temporary Diversion

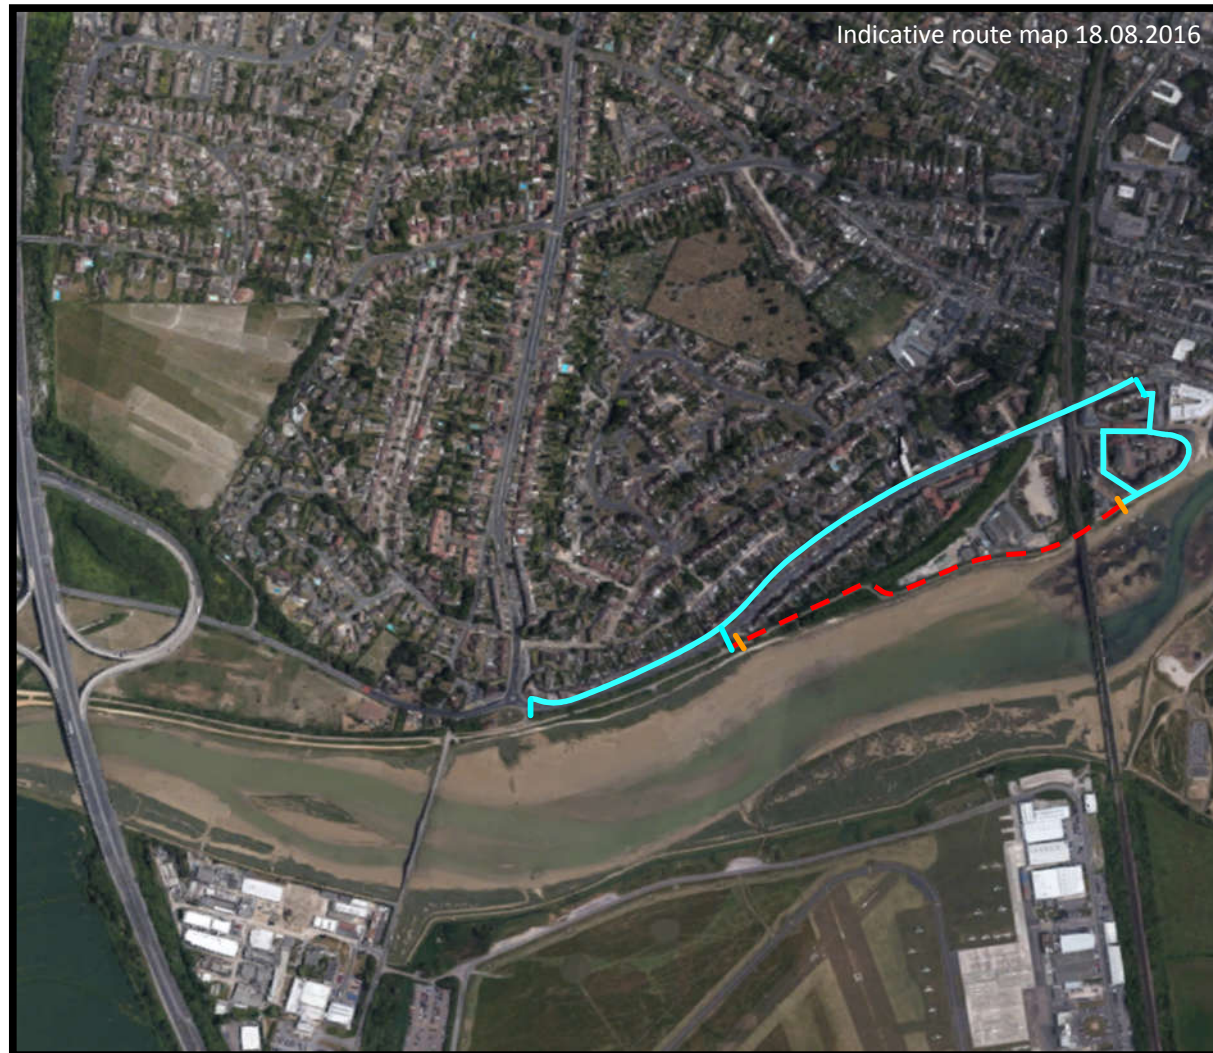

The Environment Agency is set to start on a major flood defence scheme that will significantly reduce flood risk in Shoreham.

One of the early phases will be for our contractor, Team Van Oord, to construct new defences along the bank of the river from the railway bridge to the A27.

In order to keep the public safe whilst the works are taking place, the Downs Link will be closed and a diversion route put in place.

Phase 1 closure date
30th Aug 2016 – Oct 2017

-  Pedestrian Route
-  Footpath Closure
-  Footpath Closed at this point

This map shows the temporary pedestrian route along Old Shoreham Road.

Signs will be placed along the route to give directions.

Please **do not** enter the construction area. There are large trucks moving around the site and deep excavations.
