

Subject:

Greening Steyning Green Consumer Group

Briefing Note

Item 4.3

Please see email below – I have noted in red what HDC have asked that we discuss and agree – We need to agree support for the venture and give an indication of positioning – including whether or not to replace existing bin from its current position with this bin or to suggest an alternative location – perhaps therefore in advance of the meeting you (Councillors) could email your thoughts to other members to start the ball rolling on provisional ideas and especially on its possible location.

Dear Parish Council

I am a member of the Greening Steyning Green Consumer group and we are looking into making recycling options more readily available within Steyning, Bramber and Beeding. We have formed a partnership with Sussex Green Living to recycle the items that don't go in the blue bins and have organised collection at the monthly farmers market.

In addition to this, I have been in touch with Horsham DC regarding public bins and whether they would collect separated rubbish if we were to position these types of bins within our town and village centres. They are happy to do this and have similar arrangements with other villages and towns in the area. **They advised that the procurement, authorisation and positioning of the bins would need to be discussed with the Parish council.**

Please can you advise who would be the best person to discuss this with?

We have done some research and found these bins which you can customise to your own needs.

Ideally, we would love to start with a bin in the high street car park in Steyning and possibly near NISA in Upper Beeding. Also, ideally, in the Bramber village car park. Obviously, the more we can have the better but we are aware of cost implications. We have also formed strong relationships with the schools to collect recycling and could look to have separated bins positioned at each of our schools as a long term plan.

We'd love to discuss the many options with yourselves.

With regards,
