

Item 6.5

To consider if we can help the Cricket club groundman with his having to deal with grass cuttings

Briefing Note

The Cricket club groundsman has approached us and asked if we can assist him with his issue of having to get rid of the grass cuttings he collects on a weekly basis. He knows he cannot dump them 'in a hedge', as it were, on the periphery of the MPF. And without a compost heap he is having to bag up the waste and place in the general waste bins by the Changing room block (See below) which he, and I'm sure we, really don't want him to do. We are licensed to put green waste in these bins, but he should be using the Cricket bins anyway.

The reason for this item is for us to discuss what options might be available to him.

Please also see a Compost bin option below.
