

I have reserved two places for the workshop noted below.

We need to agree to two reps please.

Chargepoint Network – Dated 16th February 2023 @ 13:00 – 14:00 GMT

Connected Kerb and WSCC are proposing another webinar for Town and Parish Councils.

WSCC have organised another opportunity to come together to update you on how the Chargepoint Network is progressing across the County on-street and in car parks in Mid Sussex and Horsham.

Following feedback from Town and Parish Councils, WSCC are looking to discuss with Town & Parish Councils the chargepoint network, and site selection process.

They will use this session to give you:

- a quick overview of the project to date,
- chargepoint locations that are commissioned and
- chargepoint locations that are coming soon across West Sussex.

This session will also allow Town & Parish Councils to ask questions about how the network is progressing, and the programme in general.

An outline agenda for the session:

- WSCC commitment to EV charging
- Introduction to the chargepoint network
 - The Partnership
 - The Contract and Tender Process
 - Progress So Far
- Introduction to Connected kerb and the chargepoints
 - Site Selection
- On-street chargepoint delivery
 - TRO Process and Consultation
 - Installation Timeframe
