Dear Greening Supporters,

Some Christmas presents come a little early, and this seasonal newsletter is packed with goodies for you! Put the kettle on and take some time out to enjoy.

Firstly we're sharing "**Meet the Neighbours**", the film we made in collaboration with Weald to Waves using their wildlife recording technology. We know you'll enjoy this heartwarming collection of footage all filmed in local gardens.

Next there's a chance to see another inspirational film at our AGM in January when we'll be screening the much talked about independent movie; "**Power Station**". See below for details.

There's also still a chance to buy tickets for this week's **Green Drinks - The Future of Farming**. Three local farmers will join us to discuss the challenges and opportunities ahead.

Keep scrolling and you'll find an enjoyable new podcast from Penny Green, the ecologist at the **Wiston Estate** which shares the biodiversity work taking place right here in our neighbourhood.

January dates for our **regular activities** are listed below. The **Community Fridge** will continue to run weekly throughout December, but will be closed on Christmas day (Thursday 25th Dec) and New Year's Day (Thursday 1st Jan).

Wishing you all a warm and merry Christmas.

Best wishes,

Geoff, Co-Chair, Greening Steyning
